

ICE STORAGE BIN 400 KG

ISM-ICB400

STANDARD FEATURES

High-capacity reserve

- ✓ Holds 400 kg of ice, enough to absorb a full day of draw plus an evening service without the machine having to keep pace in real time.
- ✓ Built for operations where ice is a raw material rather than a garnish: banqueting kitchens, fish handling and central production units.
- ✓ Stainless-steel outer shell over high-density polyurethane foam insulation, holding the cold chain through a long supply interruption.
- ✓ Food-grade polyethylene inner tank with radiused corners for routine stripping and sanitising.
- ✓ Accepts the full range of modular heads across the KP, SP, KS, KQ and KFE families. Confirm door widths before delivery — the unit is over 1.2 m wide.

PRODUCT SPECIFICATIONS

Dimensions	123.5 × 87.3 × 127 cm
Storage capacity	400 kg
