

CUBE ICE MAKER 25 KG

ISM-ICM25

STANDARD FEATURES

Self-contained · 6 kg bin

- ✓ A full cube of 36 g, 42 × 45 mm, dense and slow to melt. It chills a glass without watering the drink down inside a few minutes, which is what a spirits or soft-drink service needs.
- ✓ Self-contained: the ice maker and a 6 kg store are one unit, so the machine sits under a counter and needs no separate bin beneath it.
- ✓ Production of 25 kg over 24 hours at 24 cubes a cycle — the output most bars, cafés and small service counters actually draw.
- ✓ Natural R290 refrigerant and a 210 W average draw on a standard single-phase supply, so no three-phase provision is needed at the point of use.
- ✓ Air or water condensation, specified at order. AISI stainless-steel body, with a potable water inlet and a gravity drain required at the machine.

PRODUCT SPECIFICATIONS

Dimensions	36.5 × 52 × 60 cm
Ice type	Full cube — 36 g
Production / 24 h	25 kg
Storage capacity	6 kg
Average power	210 W
Energy source	220–240 V / 50 Hz
