

CUBE ICE MAKER 50 KG

ISM-ICM50

STANDARD FEATURES

Self-contained · 25 kg bin

- ✓ Twice the production of the 25 kg machine and four times the reserve, in a cabinet that still fits under a standard counter.
- ✓ The 25 kg store is what separates it in service: the counter draws from a full bin at peak instead of waiting on production to catch up.
- ✓ Same full cube of 36 g, 42 × 45 mm, at 24 cubes a cycle. Dense, clear and slow-melting, which suits a bar, a restaurant service and a hotel breakfast line alike.
- ✓ Natural R290 refrigerant and a 470 W average draw on a standard single-phase supply.
- ✓ Air or water condensation, specified at order. AISI stainless-steel body, with a potable water inlet and a gravity drain required at the machine.

PRODUCT SPECIFICATIONS

Dimensions	50 × 60 × 79.5 cm
Ice type	Full cube — 36 g
Production / 24 h	50 kg
Storage capacity	25 kg
Average power	470 W
Energy source	220–240 V / 50 Hz
