

MODULAR DICE ICE MAKER

ISM-KQ450

STANDARD FEATURES

450 kg / 24 h · bin sold separately

- ✓ Modular head producing 450 kg over 24 hours. Production and storage are sized independently, so the reserve can be increased later without replacing the machine.
- ✓ A continuous water jet over a vertical stainless-steel evaporator forms a hard, clear, slow-melting cube rather than the cloudy hollow cube a spray plate gives.
- ✓ Three cube weights — 6 g, 10 g and 17 g — let one machine serve a cocktail bar, a drinks dispenser and a fish counter.
- ✓ Pairs with the ISM-ICB180 bin for 181 kg of storage or the ISM-ICB400 for 400 kg; bin capacity should follow daily draw rather than daily production.
- ✓ Air or water condensation, specified at order. Three-phase supply, potable water feed and a gravity drain required at the installation point.

PRODUCT SPECIFICATIONS

Dimensions	76 × 62 × 72.5 cm
Ice type	Dice — 6 / 10 / 17 g
Production / 24 h	450 kg
Total power	2 350 W
Condensation	Air or water
Compatible bins	ISM-ICB180 · ISM-ICB400
