

GRANULAR ICE MAKER 140 KG

ISM-KS140

STANDARD FEATURES

Self-contained · 25 kg bin

- ✓ Granular ice packs tightly around whatever it touches, holding fish, seafood and cut produce at temperature without bruising them — the working ice for a fish counter, salad bar or buffet line.
- ✓ Production of 140 kg over 24 hours into an integrated 25 kg bin, so the machine and its store are one unit and drop straight into a service area.
- ✓ Air or water condensation, specified at order. Water cooling is the usual choice where the plant space runs warm, and the machine is rated to 43 °C ambient.
- ✓ AISI 304 stainless steel inside and out with polyurethane foam insulation, giving a cleanable food-contact surface and stable bin temperature.
- ✓ Electromechanical control, adjustable feet and front service access keep installation and routine maintenance straightforward.

PRODUCT SPECIFICATIONS

Dimensions	50 × 67 × 79.6 cm
Ice type	Granular (flake)
Production / 24 h	140 kg
Storage capacity	25 kg
Total power	700 W
Energy source	220–240 V / 50 Hz
